ASX ANNOUNCEMENT

25th September 2007

Rock Chip Samples for Uranium – Wologorang NT

Gulf Mines Limited (ASX:GLM) advises that the systematic rock chip and soil sampling of the radiometric anomalies identified by airborne scintillometer survey completed last year is well underway. Approximately 150 samples are at the laboratory or in transit, and the programme will generate about 100 samples per week as it goes forward.

Sampling of the radiometric anomaly which is co-incident with the south west portion of the Seven Mile grid has been completed.

for further information contact Graham Reveleigh 07 4033 1805

"The information in this Announcement that relates to Exploration Results is based on information compiled by Graham Reveleigh, who is a Member of The Australasian Institute of Mining and Metallurgy. Mr Reveleigh is the Managing Director of Gulf Mines Limited, and has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2004 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Mr Reveleigh consents to the inclusion in the report of the matters based on his information in the form and context in which it appears".
